

MUHAMMAD REZA

SOFTWARE ENGINEER • UI/UX DESIGNER

Karachi, Pakistan | +92-314-0394668 | rzarji00@gmail.com

LinkedIn: <https://www.linkedin.com/in/muhammad-reza-rawjani/>

PROFESSIONAL SUMMARY

Software Engineering student and aspiring UI/UX Designer with hands-on experience building C and Java applications and designing user-centered interfaces in Figma. Skilled at translating problem statements into clean, functional code and translating user needs into intuitive, well-structured designs. Eager to contribute technical and design skills to a team building real-world software products while continuing to grow as an engineer and designer.

SKILLS

- Programming Languages:** C, Java, Object-Oriented Programming, MySQL
- UI/UX Design:** Adobe Photoshop, Adobe Illustrator, Figma (Wireframing, Prototyping, User Flows), Canva
- Web Development:** HTML, CSS, JavaScript, Front-End Fundamentals
- Tools & Productivity:** MS Office (Word, Excel, PowerPoint)
- Core Strengths:** Problem-Solving, Attention to Detail, Time Management

EXPERIENCE

UI/UX Design Intern | CodeAlpha (Remote)

Aug 10 – Sep 10, 2026

- Selected for a remote UI/UX design internship focused on applying core design principles to real-world briefs.
- Creating wireframes, interactive prototypes, and user flows in Figma under project deadlines.
- Collaborating with a remote team to review designs and iterate based on feedback and usability best practices.

Junior Java Developer, Intern | Progree (Remote)

Aug 5 – Sep 5, 2026

- Completed a Java + MySQL internship at Progree, building backend-focused console applications and strengthening core Java and database skills.
- Developed projects covering text processing with Regular Expressions, object-oriented portfolio management, and multithreaded systems using the Executor Framework and JDBC.
- Applied JDBC with MySQL for data persistence, including PreparedStatements and transaction management using commit and rollback.

Stock Manager | A.A & Co.

Aug – Oct 2024

- Managed day-to-day stock operations for a construction company, tracking incoming and outgoing inventory.
- Maintained accurate records of available, sold, and ordered stock to prevent shortages and overstocking.
- Prepared and managed monthly expense sheets, supporting accurate financial tracking for the business.

EDUCATION

Bachelor of Science in Software Engineering

Expected 2028

DHA Suffa University | CGPA: 3.52

Intermediate | Computer Science

2022

Govt. Islamia Science College

CERTIFICATIONS

- Scratch Programming Certificate | GDGoC@DSU
- Hashcode Programming Certificate | GDGoC@DSU

LANGUAGES

English | Urdu

PROJECTS

➤ University Projects:

Built a range of C and Java applications throughout coursework, moving from console-based logic to full GUI applications. These projects reflect a solid grasp of programming fundamentals, data structures, control flow, and object-oriented design as well as growing experience building complete, usable software systems.

Food Ordering System

C | 2024

Console-based application allowing users to browse a menu, place orders, and calculate bills. Applied core C concepts including arrays, functions, and structured input handling to manage order data.

Cricket Game

C | 2024

Console-based cricket simulation game built using C, featuring randomized scoring logic and turn-based gameplay. Strengthened understanding of loops, conditionals, and function-driven program design.

Ticket Reservation Platform

Java + GUI | 2025

Java desktop application with a graphical interface for booking and canceling tickets. Implemented object-oriented design and event-driven GUI components to deliver a smooth, interactive user experience.

Student Management System

Java | 2026

Java-based system for managing student records, supporting adding, editing, searching, and deleting entries. Focused on clean OOP structure and reliable data handling for real-world usability.

➤ Progree Java Internship:

Completed a Java + MySQL internship at Progree, building three backend-focused Java applications spanning text processing, object-oriented systems design, and concurrent database programming. Developed a multi-criteria text processing tool using Regular Expressions and the Collections framework for word-frequency analysis. Built an object-oriented virtual financial portfolio manager applying core OOP principles with CSV-based data persistence. Designed a real-time, multi-threaded hotel inventory backend using Java's Executor Framework, per-room locking, and JDBC-based MySQL transactions to prevent race conditions and double booking.

Multi-Criteria Text Processing Tool

Java | 2026

Command-line text analysis application that reads a user-specified file, uses Regular Expressions to extract and clean words, and counts frequency with a HashMap, sorting results using the Collections framework. Included robust file-handling with try-catch and try-with-resources.

Object-Oriented Virtual Financial Portfolio

Java | 2026

Console-based investment portfolio manager built with OOP principles including classes, inheritance, polymorphism, and interfaces. Supported buying and selling stock holdings, calculated total portfolio value, and persisted data to CSV using Java I/O streams.

Real-Time Multi-Threaded Hotel Inventory Backend

Java + MySQL | 2026

Concurrent hotel booking backend simulating simultaneous customer requests using ExecutorService, ConcurrentHashMap, and ReentrantLock to prevent race conditions and double booking. Connected to MySQL via JDBC with PreparedStatements and transaction management (setAutoCommit, commit, rollback) for safe, reliable database operations.

➤ UI/UX Design Projects

Designed a personal portfolio website and an e-commerce online store from start to finish. Mapped out simple user journeys, drew layout wireframes, and created clickable prototypes to test how pages connect. Built a clean visual design system with matching fonts, colors, and reusable buttons for mobile and desktop screens. Focused on making product search, shopping carts, and checkout screens fast, smooth, and easy for people to use.

Portfolio Design

Figma

Designed a personal portfolio website in Figma to showcase projects, skills, and case studies. Focused on clean typography, intuitive navigation, and a responsive layout across devices. Translated the design into a live, functioning site to present work professionally to recruiters and collaborators.

E-Commerce Website Wireframe Design

Figma

Created low-to-high fidelity wireframes for an e-commerce website covering the homepage, product listings, product detail pages, and checkout flow. Prioritized clear information hierarchy and streamlined navigation to reduce friction in the shopping journey. Built a reusable component system in Figma to keep layouts consistent across pages.

E-Commerce Store Mobile Application Design

Figma

End-to-end mobile app design for an e-commerce store, including wireframes and interactive prototypes for browsing, product details, cart, and checkout. Focused on an intuitive shopping flow and consistent visual design.
