

MUHAMMAD REZA

SOFTWARE ENGINEER • UI/UX DESIGNER

Karachi, Pakistan | +92-314-0394668 | rzarji00@gmail.com

LinkedIn: <https://www.linkedin.com/in/muhammad-reza-rawjani/>

PROFESSIONAL SUMMARY

Software Engineering student and aspiring UI/UX Designer with hands-on experience building C and Java applications and designing user-centered interfaces in Figma. Skilled at translating problem statements into clean, functional code and translating user needs into intuitive, well-structured designs. Eager to contribute technical and design skills to a team building real-world software products while continuing to grow as an engineer and designer.

SKILLS

- Programming Languages: C, Java, Object-Oriented Programming
- UI/UX Design: Figma (Wireframing, Prototyping, User Flows), Canva
- Web Development: HTML, CSS, Front-End Fundamentals
- Tools & Productivity: MS Office (Word, Excel, PowerPoint)
- Core Strengths: Problem-Solving, Attention to Detail, Time Management

EXPERIENCE

UI/UX Design Intern | CodeAlpha (Remote)

Aug 10 – Sep 10, 2026

- Selected for a remote UI/UX design internship focused on applying core design principles to real-world briefs.
- Creating wireframes, interactive prototypes, and user flows in Figma under project deadlines.
- Collaborating with a remote team to review designs and iterate based on feedback and usability best practices.

Stock Manager | A.A & Co.

Aug – Oct 2024

- Managed day-to-day stock operations for a construction company, tracking incoming and outgoing inventory.
- Maintained accurate records of available, sold, and ordered stock to prevent shortages and overstocking.
- Prepared and managed monthly expense sheets, supporting accurate financial tracking for the business.

EDUCATION

Bachelor of Science in Software Engineering

Expected 2028

DHA Suffa University | CGPA: 3.52

Intermediate | Computer Science

2022

Govt. Islamia Science College

CERTIFICATIONS

- Scratch Programming Certificate | GDGoC@DSU
- Hashcode Programming Certificate | GDGoC@DSU

LANGUAGES

English | Urdu

PROJECTS

➤ University Projects:

Built a range of C and Java applications throughout coursework, moving from console-based logic to full GUI applications. These projects reflect a solid grasp of programming fundamentals, data structures, control flow, and object-oriented design as well as growing experience building complete, usable software systems.

Food Ordering System

C | 2024

Console-based application allowing users to browse a menu, place orders, and calculate bills. Applied core C concepts including arrays, functions, and structured input handling to manage order data.

Cricket Game

C | 2024

Console-based cricket simulation game built using C, featuring randomized scoring logic and turn-based gameplay. Strengthened understanding of loops, conditionals, and function-driven program design.

Ticket Reservation Platform

Java + GUI | 2025

Java desktop application with a graphical interface for booking and canceling tickets. Implemented object-oriented design and event-driven GUI components to deliver a smooth, interactive user experience.

Student Management System

Java | 2026

Java-based system for managing student records, supporting adding, editing, searching, and deleting entries. Focused on clean OOP structure and reliable data handling for real-world usability.

➤ UI/UX Design Projects

Design-focused projects built in Figma, covering the full process from low-fidelity wireframes to interactive, high-fidelity prototypes. Emphasis on user flows, usability, and clean visual hierarchy to create interfaces that are simple to navigate.

E-Commerce Store Mobile Application Design

Figma

End-to-end mobile app design for an e-commerce store, including wireframes and interactive prototypes for browsing, product details, cart, and checkout. Focused on an intuitive shopping flow and consistent visual design.
